

PREDICT IS TO PREVENT

What is Meridian Diagnostics

Meridian Diagnostics is first of its kind computer-controlled health check system, developed by 487 physicians and Russia's leading scientists over 18 years of research to check and maintain health of Astronauts in Space, which is now available for general public through Meridian Diagnostic Center.

Meridian Diagnosis system is based on Energy Flow in the human body. Every human being has 72 meridians and 12 of these are fundamental meridians through which the energy flows in the body.

Meridian Diagnosis measure and determines which meridians of the body are unbalanced, how the problem originated and what can be done to rectify the imbalance in the body.

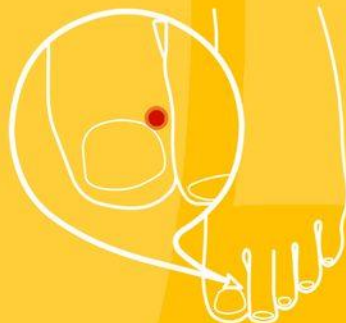

How does Meridian Diagnosis work

Meridians are the energy paths of the body. They form efficient but very sensitive system. Any discrepancies or deficiencies in these energy paths lasting for long time results in to physical, anatomical and psychological disorder. Meridian Diagnostic system determines which meridians of the body are unbalanced, how the problem originated and what can be done to rectify the imbalance in the body.

Meridian Diagnostics measures the energy flow of the meridians using modern computer technology. Readings are taken using special sensors and are sent to central server in Germany (Frankfurt) via satellite. This data is then processed, evaluated and the inference is sent back with possible remedies

The entire process takes less than 3 minutes. The inference is represented graphically and the interpretation of the graph is determined. Through this information we can objectively and accurately learn about the current condition of energy in the body, and where energy blockages exist. This holistic method is based on 5000 year old knowledge regarding energy and their flows in the meridians

Causes of Disturbance

If we know which meridians are disturbed the next step should be finding out what caused the disturbance. It is possible to distinguish the origin of disturbances by adding specific signals corresponding to known causes of symptoms and consequently checking the reactions of meridians to the signals given. Accordingly we read from the curves which organs and systems experience most interference. Common causes of these interferences are viruses, bacteria, fungus, parasites, toxic stress, psyche, teeth, geopathology / electrosmog, miasma, scars, interference in brain kernels (nuclei) and in chakras.

Benefits of Meridian Diagnosis

- Safe, a Completely painless, no radiation and non intrusive methods.
- Comprehensive health screening system
- Early detection which leads to prevention of diseases if care is taken immediately.
- Helps you understand your body in more better way and prevent illness through early detection of energy deficiencies with the targeted therapy.
- Health prediction long before the physical or clinical symptoms appear
- Identifying the cause and root energy track

Examinee's requirements before undergoing the Body Scan

The person needs be in a relaxed state preferably in morning time.

Should avoid alcohol, tea, coffee and other stimulating beverages, drugs, 8 hours before the test

Scan is conducted at least 2 hours post lunch or dinner

All metal objects or electrical gadgets to be removed before examination

Note : Scan is not recommended and performed on pregnant ladies

REMEDIES

Yoga

Yoga therapy in recent times has been instrumental in curing countless number of diseases with the help of mental or physical yogic exercises. This special kind of treatment is an integral part of the Indian yogic culture.

The history and origin of yoga date back to the ancient years when a number of holy saints used to practice this form of treatment in their daily lives in India. Many instances of practicing yoga have been traced in Upanishads.

At Meridian Diagnostic Center, we prescribe and guide patients with specific yogasana, based on the diagnosis to heal blocked meridians.

Chakra Balancing

At the central core of our body spin seven main wheel-like energy centers called Chakras. Chakras have the ability to receive, assimilate and transmit energy.

Each chakra is a vortex, spinning life-force energy into or out of the body. In fact, the word chakra is from the Sanskrit word meaning "wheel of light". When we are in a state of ill health, the chakras may be distorted, out of alignment or even stagnant. When this happens, life force energy can not flow in and out freely and the physical body may suffer.

Meridian Diagnosis works on the principle of 5 elements of the nature, which are directly connected with chakras in Human body. The Diagnosis identifies and indicates weakness of a Chakra and its direct association with the body organ.

Body harmony can be achieved by various therapies in balancing chakras, which in return helps the body organ to recover and come to its natural state.

Ayurveda

Ayurveda is the traditional energetic medicine created in India. The word Ayurveda means "knowledge of the living." In Ayurvedic medicine, it is postulated that people are healthy as long as the energy in their spirit and body are balanced.

The core idea of Ayurveda is that a sickness arises first in the spirit, and then, if ignored, manifests itself in the body. An exception to this is certain genetic illnesses.

An illustration of this principle is even in an ancient Indian saying:

"If you want to know how your body is tomorrow, then look to your ideas of today."

In Ayurveda, everything is built on the union of 5 elements:

Earth, water, fire, air, and ether.

These 5 elements form the basis for 3 vitalities. All energy, in the spirit, in the body, and in the world around us, has three bodily humors, which are called dosha's. Together, these 3 doshas are called the 'tridosha'.

The 3 bodily humors are:

- Vata
- Pitta
- Kapha

According to Ayurveda, there are 72,00,000 veins in a human body. The advanced Meridian Diagnosis technology helps identify blockages by scanning each and every vein.

Acupressure

Acupressure is one of the best ways to get rid of all diseases just by applying pressure on specific points on the body, hands and feet. Acupressure opens the blocked channels and improves the blood and energy circulation in the area affected. Acupressure is worldwide accepted for its quick results and healing chronic problems.

How does Meridian Diagnosis help Doctors

Early detection of the disease helps Doctors to take preventive measures and help avoid spreading of it. The purpose of Meridian Diagnosis is to predict an illness much before its physical symptoms appear and help prevent it through various therapies and diets. However, Chronic illness once developed should not be ignored and proper consultation should be taken from Doctors. Diseases like Cancer, once developed, can not be detected by MD. The activity of the anaerobic cells is beyond the MD spectrum. However, years before cancer develops, the onset of the disease can be prevented. MD can reveal its energy deficiency in the affected organ.

How early can Meridian Diagnosis Predict an illness

Meridian Diagnosis can predict 6 months to 1 year before the symptoms of illness appear.
